

# The DV36 & The DV42

## ZERO CLEARANCE FIREPLACES

The Sherwood Home Collection

## *The Manor*

For those who desire a more permanent traditional look given by cast iron, the Manor features a large bay viewing area in diamond black porcelain enamel or black painted finishes.

Available on the DV-42 model only.

### *Enviro Safety Features*

#### **Gas Safety Shut-Off Feature**

All of our fireplaces are equipped with state of the art safety features. Thermopile and Thermocouple sensors are positioned to turn off the gas flow quickly if there is a loss of flame.

#### **Pressure Relief System**

Every Enviro fireplace has a safety relief system to dissipate any pressure build up in the firebox.

#### **Ceramic Glass**

Thick ceramic glass is amongst the strongest in the industry.

#### **Direct Vent Technology**

All Enviro fireplaces use a Direct Vent system that completely seals your fireplace from the room and only uses outside air for combustion.

# The Cape Cod

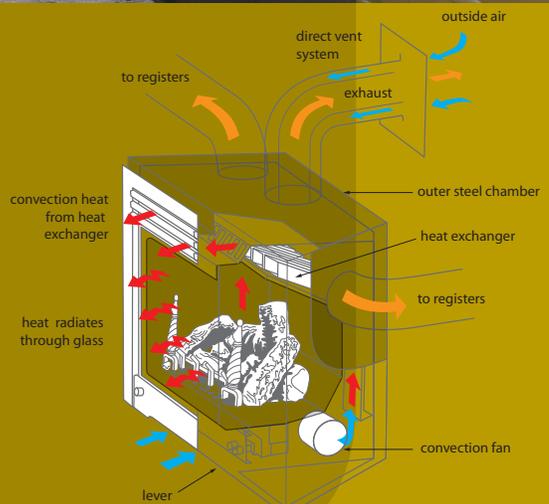

The Cape Cod statement is a strong and permanent one, reminiscent of the craftsmanship of a bygone era. This version of the Cape Cod face fits the DV-42. It is finished in a deep rich metallic black paint.

## HeatFlo® and Radiant Heat Systems

**Heatflo®** – DV-42 models are equipped with the **Enviro HeatFlo®** air transfer system. This system lets you transfer some of the heat from your fireplace to other areas of your home.

**Radiant Heat** – The heat is held in the firebox for a longer time because our flame meanders slowly – more of the available heat is given the time to radiate through the glass to the room.

All Enviro fireplaces use a **Direct Vent Technology** – only outside air is used for combustion.

# The DV-36 Cape Cod

The DV-36 also has an exclusive 'Cape Cod' style optional design. The control panel and convection air outlet screens can be covered with the 'Vine' trim option.

DV-36 Trim Options:

# The DV-36

Our designers have created a more competitive fireplace – it can be installed straight out of the box.

The DV-36 comes with our painted louvers; or customized with a variety of trim options or faces, 'Banker's Brown' brick firebox liner or a porcelain liner.

DV 36 with nickel louvers and optional black porcelain liner

Painted vine

DV-36 Louver Trim Options:

Antique Copper louvers (2 sets)

Brushed Nickel louvers (2 sets)

# The Lodge

The Lodge style shows the large unobstructed glass area of the fireplace at its best, emphasizing its heart – the fire. The Lodge was designed to suit the clean lines of today's modern home.

Brushed nickel louvers and knobs come as standard.

Available on the DV-42.

## PROFLAME REMOTE -

*All Enviro fireplaces can be operated with the optional proflame remote system which will control:*

- *on/off operation of the main burner*
- *provide thermostatic control*
- *Smart Thermostat adjusts the flame height in accordance to the difference between the set point temperature and the actual room temperatures. As the room temperature gets closer to the set point, the Smart Function will modulate the flame down.*
- *Batteries in the receiver provide back-up to the remote if the power goes out.*
- *The remote control is equipped with a child safety lock-out*

*(You must order either the NG or LP remote control system)*

## Cottage Trim Options:

metallic black paint

antique copper

24-kt gold

pewter

# The Cottage

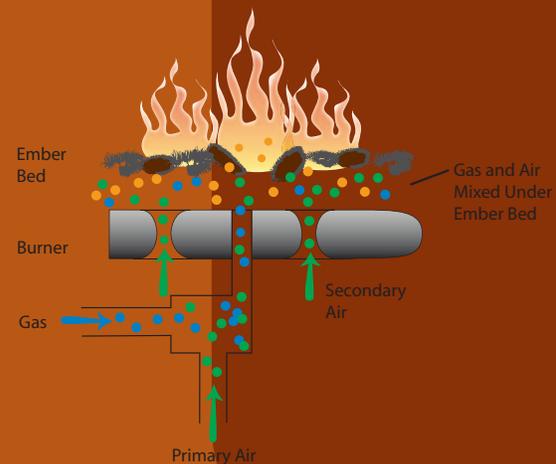

The Cottage has a subtle 3-D curve that complements the top arch. Rich-textured accents adorn the top, the air openings, and the control panel door. The Cottage is finished in metallic black paint and has four optional trim finishes. This frame fits on the DV-42.

## “Enviro EmberGlo” Burner System

At the heart of all Enviro fireplaces is the fire. Our unique stainless steel burner design allows us to put the flame anywhere in the firebox.

Our exclusive “Enviro EmberGlo” Burner system produces the most realistic flames available today. The gas and air is blended below the ember bed so we can slow down the flames to give the gentle, meandering, and lazy look of a wood fire.

You can turn down the heat by up to 50%, which helps to lower running costs. The fireplaces can be run on natural gas or LP gas, and is easy to change from one gas type to another.

## Framing Dimensions

	DV-36	DV-42
A	33 3/4" (85.7 cm)	47" (119.4 cm)

- All Enviro fireplaces can run on either natural gas or propane.
- Our exclusive pilot system ensures continual heat – even if the power goes out.
- The direct vent system allows for easy installation and it can vent from the top or the rear of the firebox.

Fireplaces are hot and can cause serious burns. When closed, these screen doors may help reduce the severity of an accidental burn. Children should always be supervised when around a hot fireplace.
